

ESCORTED CAPRA SLAM EUROPA

Hunting season: October + November

Main hunting countries:

Austria – Alpine chamois: The Alpine mountains of Austria, Switzerland, South-Germany, Italy, Slovenia and France are the habitat of the Alpine Chamois. And the highest number of chamois not only in Austria but in all Europe lives on the „Hochschwab“, where I will hunt with my Grand Slam guests at an altitude between 3600 – 6600 ft. A second hunting area possible to hunt is north of the “Hochschwab” just in neighbourhood.

Hunting in Austria requires physical fitness.

Romania - Carpathian chamois: The habitat of the Carpathian Chamois is limited to the Romanian Alps only. They grow the top quality chamois trophies of 120 CIC points and even more in the world. The world record trophies were harvested in Romania.

The hunting is only done on foot and hunting at an altitude of 4500 – 10000 ft. The hunter has to have a very good physical condition.

Croatia – Balkan chamois: The habitat of Balkan Chamois is the countries of Serbia, Bulgaria, Macedonia and Croatia. For your Grand Slam I will go for them in Croatia in the mountains along the Adriatic coast around Split with always having a breath taking view of the sea. The hunting area does not require special fitness, only the ability to walk over longer distances. We will hunt at an altitude between 1500 – 3900 ft.
